Exhibit "A"

Survey Requirements for Agricultural Conservation Easements (ACE)

Scope of Work

1) Background

- a) The County of Washington (the "County") through the Washington County Planning Commission administers the Washington County Agricultural Conservation Easement Program (the "Program") that purchases agricultural conservation easements (the "Easement") on farms limiting land to agricultural production in perpetuity. The Program is overseen by the Washington County Agricultural Land Preservation Board and governed by Act 43 and the regulations in 7 Pa. Code, Chapter 138e.
- b) The County typically requires approximately one (1) to three (3) surveys annually. The County will request survey dependent upon their standing in the process.

2) Scope of Work for Professional Land Surveying Services

- a) The County shall require that a survey be performed for each property that will be subject to an agricultural conservation easement.
- b) When the landowner withholds land from the inclusion in the easement boundary, the land accepted or withheld shall be surveyed.
- c) If the landowners desire to withhold/exclude acreage from the Easement, excluding the existing homestead and curtilage, the landowner shall bear the cost of survey, or that portion of the survey done to delineate the withhold/excluded acreage. If the County requires land to be excluded, the County shall assume the cost to survey that area.
- d) The County shall provide a Title Report for all surveys as required.

3) Survey and Plat Requirements

- a) Survey Requirements
 - i) The Survey shall have a closure error of not greater than one (1) foot per 10,000 linear feet in the Survey and shall otherwise comply with the boundary Survey measurement standards published by the Pennsylvania Society of Land Surveyors in its "Manual of Practice for Professional Land Surveyors in the Commonwealth of Pennsylvania," adopted July 10, 1998, or its most current successor document.

- ii)** A recordable legal description shall be prepared setting forth the metes, bounds, monumentation, exceptions, easements, and rights-of-way with respect to the farmland tract or other subject of the survey.
- iii)** A copy of the final boundary survey in both paper and digital electronic format shall be provided. The digital format shall show the bearings and distances for each course surveyed and the latitude and longitude for each monument. This digital depiction shall be in PDF format. This information will be used to locate the property on the Statewide Farmland Preservation GIS database. A separate copy of the boundary survey overlaid on an aerial map shall also be provided. In addition, four (4) full-size paper copies of the plotted field survey maps from the digital file shall be provided showing the course bearings and distances and other annotations and symbols. A copy of the legal description relative to each tract of land on which an Easement is to be purchased, as well as relative to all parcels to be excluded from the Easement, must accompany each full-size plotted field survey map.
- iv)** A paper copy of the plotted field survey map from the digital file shall be provided showing the course bearings and distances and other annotations and symbols. Two sequential ground control monuments shall be plotted on the survey map along with the latitude and longitude readings expressed in decimal degrees.
- v)** For each tract, coordinates accurate to plus (+) or minus (-) three (3) meters shall be established for at least two (2) ground control points located sequentially along the boundary survey. These coordinates shall be identified by latitude and longitude expressed in decimal degrees with an accuracy of six (6) recorded decimal places. The required locations of such coordinates shall be marked with permanent concrete monuments. These coordinates shall be based on the "North American Datum of 1983," and shall be obtained through field observation or verification.
- vi)** Monumentation described in the legal description shall include at least one (1) course and distance referencing an affixed marker or monument of a type commonly placed in the field by a surveyor. Fixed markers may include iron pins, pk nails, spikes, concrete monuments, or stones.
- vii)** The Survey shall establish monumentation for at least two (2) ground control points located sequentially along the boundary survey. This monumentation shall consist of permanent, concrete markers of substantial length and width containing ferrous or other materials detectable by an electromagnetic locator. The identity of the Surveyor who places the monument shall be affixed or marked upon the monument so that it can be ascertained by inspection of the monument in the field.
- viii)** Survey work shall include Recorder of Deeds research as to all adjoining' deeds and possible easements, relative to potential

encroaching/conflicting deed descriptions. If encroachments are discovered during the process, the Surveyor shall inform the County, who will confer with the landowner and determine whether to exclude the area from the easement purchase. In all cases, the Surveyor shall confer with the landowner prior to the commencement of field work. Surveyor shall contact the landowner and/or farm operator and provide at least 3 to 5 days' notice prior to entering the property to commence surveying.

b) Plat Requirements

- i)** All Surveys shall require a map or plat produced in accordance with the Manual of Practice for Professional Land Surveyors in the Commonwealth of Pennsylvania as adopted by the Pennsylvania Society of Land Surveyors. The plat shall be drawn at a scale of no greater than 1" = 200'. The plat shall identify the purpose of the Survey, ownership and address of the property, municipality, and county in which the property is located, date and scale of the plat, and the licensed Surveyor responsible for the preparation of the survey and plat.
